

Pope John Paul II Cultural Center

Problem:

Working with Edwin Schlossburg Design of New York, Willmetter, Illinois-based Cable Design, Inc., an innovative cable and display design firm, created a heavenly look for visitors at the Pope John Paul II Cultural Center at Catholic University in Washington, D.C.

Before visitors walk into the Pope John Paul II Cultural Center, visitors descend down a three-level ramp. Cable Design was hired to install luma-site, a curtain of panels similar in texture to a fiberglass product. The panels gave the illusion of texture and depth; yet as a giant room divider.

Solution:
